FEATURES OF THE COVERS

FABRIC COATED WITH BI-STRETCH POLYURETHANE

- Reduces friction and shear effects.
- Supple and soft to the touch (comfortable).
- Favours the exchange of gases (steam, sweat):
 - fights against maceration.
- Impermeable material:
 - better hygiene,
 - longer support system lifespan.
- Washable at 90°C, can be decontaminated using cold sprays.
- Treated to resist fire.
- Boot, wedge and pad models have a non-slip lower face to help to stay in place.
- In multi-patient use, it is preferable to buy one new cover per patient.

Unlike most systems attached to lower limbs using belts and Velcro fasteners, which are uncomfortable and cause irritation, the SYST'AM® P912L is entirely protected by a cover and has a particularly comfortable attachment system that is easy to adjust:

- the attachment system offers sustainable support maintaining the device in the right position,
- the system is easy to install.
